

LONG-RANGE, SECURE-VOICE REQUIREMENTS (Keyed to questions on attachment)

LOCAL SYSTEM:

1. The secure phone service is adequate at the present time; additional instruments will be required for EO/OL, ~~SA-D/L~~, ~~AEO/OL~~, and AGC/OL--these offices do not presently have a secure voice instrument.
2. D/L and DD/L: ~~5%~~ 10% SM INSTRUMENTS
3. D/L and DD/L: Approximately 50% of the calls are with persons in other Agency buildings; only about 1% of the calls made are with persons in other Government agencies. The percentage of classified calls to other Government agencies is almost nil.
4. Top Secret Codeword security level would be required for D/L and DD/L.  
*EO AND PMS*
5. This office does have a requirement for other than voice system. The new system should be designed to include ability to transmit classified and unclassified document facsimiles from other Agency/Government buildings.
6. Convenience features desired: Conferencing (dial-up)--up to 10 and pre-set conferees.
7. The key system (secretarial answering) would be desired.

OTHER COMMUNICATION REQUIREMENTS

1. An intercom system between AGC/OL and O-D/L secretaries. *Now*
2. Supply Division has asked for an additional secure line extension which will be located outside  office (the other extension is now located in  office). (Supply Division will include this requirement in their report if it is decided to go ahead and install an extra instrument.) STATINTL  
STATINTL
3. Determination should be made as to whether or not the sterile  line, presently on D/L, DD/L, and EO/OL instruments (as well as on secretary call directors) should be included on ~~SA-D/L~~, AEO/OL, and AGC/OL instruments. PK  
*YES* *Now*

MEMORANDUM FOR: Plans and Programs Staff, OL

SUBJECT : Communications Requirements for FY 1976 and  
Long-Range Secure-Voice Requirements

1. At the present time, we have adequate secure telephone service since generally speaking the personnel matters which we discuss are not classified. When we need a secure system, it is so infrequent that we find use of the system available to the Director of Logistics more than adequate. We would not find any great advantage in overseas telephone systems since all of our overseas employees are in operating components and communications to those employees would be through those components.

25X1

3. What is needed in the immediate future is a system to give the recipient of a call an immediate indication as to whether the call is coming from inside or outside. For example, could a switchboard system be so arranged to permit a light on the telephone to come on whenever a call is coming from outside?
